

RECUE

Recue is the creative outlet of Riku Annala, a Helsinki based producer exploring the left field of electronic music. Recue's earliest recordings date back to the early 2000s and his genre-fluid approach to music has led to work with labels like **Touched Music** and **Detroit Underground**. Recue's work often features collaborative elements and he's had the pleasure to work with artists such as **Robot Koch**, **Jamie Lidell**, **Julien Marchal** and **Jesse Markin** either through direct features in his solo material or through remixing their work. His music has also served as the backdrop for theater and TV productions, one being the travel series **Madventures**.

His latest body of work **Tensegrity** has been released through the Finnish record label **Signal Life**, and it delves into converting non-linear storytelling devices from literature and cinema into the musical realm by dismantling static tempo completely.
